PRATIK PALKAR

SEO & GEO PROJECT MANAGER

Mumbai, India 400078 | +91 86899 15775 | pratikpalkar1703@gmail.com | linkedin.com/in/pratik-palkar

PROFILE

I make brands findable. On Google, and increasingly inside AI answers. Seven years in organic growth, now running SEO and GEO delivery for 5+ clients and a team at Growisto across D2C/e-commerce, B2B SaaS and BFSI. What makes me unusual: I don't just recommend the work, I build the AI tools that run it. 13 web-based SEO and GEO tools I scoped, built with Claude and put into daily use across the agency. I have a habit of turning “we should be tracking that” into a tool that tracks it.

7+ years SEO, GEO & digital growth	**5+ clients** Plus an SEO delivery team	**13 AI tools** 5 web apps · 8 plugins, shipped	**D2C · Auto · SaaS · BFSI** E-commerce, automotive, B2B, finance

Toolkit: Claude and OpenAI APIs, Bright Data API for data scraping, Ahrefs API, GitHub, Render.com · Ahrefs, SEMrush, Screaming Frog, GA4, Google Search Console, GTM event setup, Looker Studio dashboard creation · Schema and entity optimization, llms.txt and AI-crawler access, internal linking, CRO, ASO

EXPERIENCE

2024-07 – Current

SEO & GEO Project Manager

Growisto, Mumbai, India

- Own organic growth strategy and delivery for 5+ clients across D2C/e-commerce, B2B SaaS and BFSI, leading a team of SEO executives through audits, roadmaps, execution, QA and client reporting.
- Built and run the agency's GEO/AEO practice, taking clients from zero visibility in AI answers to a tracked, reported channel, with a repeatable playbook now applied across accounts.
- Restructured content for AI retrieval using answer-first formatting, semantic chunking, FAQ blocks and definitional openers, improving how cleanly LLMs extract and cite client pages.
- Led schema and entity optimization programs (structured data, entity disambiguation, knowledge-graph consistency), and configured AI crawler access via llms.txt and robots directives for GPTBot, PerplexityBot, ClaudeBot and Google-Extended.
- Launched a citation outreach program targeting the third-party sources LLMs cite most: listicles, review platforms, forums and industry directories. Brand presence inside AI-generated answers went up as a result.
- Designed an AI visibility tracking system measuring brand mentions, citations and share of voice across ChatGPT, Perplexity and Google AI Overviews, making GEO a reported metric rather than an assumption.
- Ran CRO audits on high-intent organic landing pages, covering page structure, above-the-fold hierarchy, CTA placement and form friction, then specced prioritized changes for client dev teams to implement, converting more of the traffic the SEO work brought in.
- Exceeded organic traffic and ranking targets across the portfolio while extending measurement to AI share of voice and citations alongside classic SEO KPIs; primary client contact across roadmaps, forecasting and QBRs.

GROWISTO AI SUITE: DESIGNED, BUILT & SHIPPED

Internal AI platform for SEO & GEO delivery: 13 tools (5 live web apps + 8 plugins)

Scoped, built and iterated with Claude · Claude / LLM APIs · Bright Data API · Ahrefs API · version-controlled on GitHub, deployed on Render.com · used daily by agency delivery teams

AI Overview Citation Scraper. Extracts the sites and pages Google cites in AI Overviews for target keywords. The data layer behind our GEO strategy.

SEO Technical Audit. 106-parameter audit across crawlability, indexation, performance and visibility, with prioritized fixes.

Competitor Analyzer. Benchmarks a site against three competitors on SEO, content, technical health and authority; Excel export.

Seasonality Dashboard. Detects seasonal demand shifts from monthly volume data and forecasts against prior years. Category PDF reports with Ahrefs benchmarking.

Schema Audit. Validates JSON-LD structured data at scale, flagging errors, warnings and rich-result opportunities.

SEO Page Level Audit. Scores pages against on-page ranking factors, surfacing content gaps and UX issues; PDF output.

Keyword Classifier. Auto-segments keyword sets by search intent, funnel stage and business value.

Backlink Shortlister. Qualifies link opportunities on authority, relevance, traffic potential and outreach viability.

Internal Linking. Maps internal link structure to surface opportunities and push link equity to priority pages.

SEO Meta Tag Generator. Batch-generates intent-aligned titles, meta descriptions and H1s from page content.

Blog Content Review. Pre-publish scoring of blog content on SEO, readability, depth and GEO/LLM readiness.

Content Creator. Generates structured long-form articles aligned to target keywords, topics and user intent.

SEO Potential Analysis. Forecasts realistic organic growth from current performance, demand and competition.

EARLIER EXPERIENCE

2023-03 – 2024-07

SEO Analyst

Mirum India Pvt Ltd, Mumbai, India

- Managed SEO for two finance-domain clients, owning strategy, recommendations and monthly performance reporting to client stakeholders.
- Drove authority-score improvement through backlink analysis, toxic and lost-link cleanup and disavow management.
- Ran competitor and SERP gap analysis to identify new landing page opportunities, converting findings into prioritized dev and content roadmaps.

2021-08 – 2023-01

Senior SEO Executive

Ethinos Digital, Bangalore, India

- Audited and optimized client sites across keyword targeting, URL strategy, site architecture and content, working with dev teams to implement SEO best practice at code level.
- Managed SEO for a large automotive client portfolio alongside other verticals.
- Built and executed link-building and digital PR outreach programs alongside PR and editorial teams.
- Developed ASO strategy for client mobile apps; presented monthly SEO and ASO performance reports to clients.

2021-01 – 2021-08

Senior SEO Executive

Gya Labs, Hong Kong (Remote)

- Led SEO for a Shopify e-commerce business, completing keyword research and on-page optimization across 120 products.
- Ran Amazon SEO to improve listing rankings; secured backlinks through Wikipedia citations and negotiated guest-post placements.

2019-02 – 2020-09

Digital Marketing Executive

Myrsa Tech, Thane, India

- Handled on-page, off-page and technical SEO, JSON-LD structured data, GTM and Pixel implementation, and organic social across 5 websites in finance, healthcare, education, IT and real estate.
- Ran Google Ads and Facebook Ads campaigns; replaced purchased contact databases with an in-house LinkedIn-based email mining process for lead generation.

2018-02 – 2018-11

Android Developer

Saint-Gobain Weber, Mumbai, India

- Sole developer of a production Android app for calculating Weber product coverage, covering UI, Firebase database, Google and anonymous authentication, in-app datasheets and support features. Published on the Google Play Store.

EDUCATION

2016-04 – 2018-04

Master of Science in Data Science

Ramnarain Ruia College, Matunga, Mumbai

- Capstone, Clothing Trend Analysis: R application with a Shiny dashboard presenting clothing trends filterable by season and region, using the Apriori algorithm to surface co-purchased combinations.

AWAY FROM THE DESK

Road trips are the other thing I take seriously.

Last year I drove Mumbai to Gangtok and back. 5,000 km, in a Ford Figo diesel rather than anything with high ground clearance, written up as a full travelogue on Team-BHP.

Route planning, fuel and rest stops, permits, and the stretches where the road surface stops being a road. It's the same instinct as the day job: work out where you're going, research the terrain instead of guessing, plan for what will go wrong, then commit and adjust.

5,000 KM
Mumbai → Gangtok → Mumbai
2025 · Ford Figo diesel · Team-BHP

3,000 KM
Mumbai → Ooty → Mumbai
The Nilgiris, the long way round
