PRATIK PALKAR

ORGANIC GROWTH · SEO & GEO LEADERSHIP · TECHNICAL SEO

Mumbai, India 400078 | +91 86899 15775 | pratikpalkar1703@gmail.com | linkedin.com/in/pratik-palkar | pratikpalkar1703-gif.github.io/resume

PROFILE

SEO and organic growth leader with 7+ years across BFSI, D2C/e-commerce and B2B SaaS. At Growisto I lead a 10-person team across 6 enterprise client projects, present roadmaps and forecasts to VPs and founders, and run a repeatable audit → roadmap → execution → QA → reporting cycle. I doubled a mutual fund's organic traffic in 3 months, fixed a lending client's loan-application quality problem, built the agency's GEO/AEO practice from zero, and mentored two junior analysts to Assistant Project Manager. I am fluent in the technical layer of a website (site architecture, schema, crawlability, Core Web Vitals) and build my own tooling to scale the work.

TEAM LED
10
3 direct reports, 7 coordinated across delegated workstreams

CLIENT PROJECTS
6
Concurrent enterprise accounts: BFSI, D2C, B2B SaaS

MENTORING
2 promoted
Junior Analyst → Assistant Project Manager

3.2x
total organic clicks in 4 months, brand flat, against US category leaders

Client names withheld under NDA · Figures from Google Search Console and GA4.

EXPERIENCE

2024-07 – Current

SEO & GEO Project Manager

Growisto, Mumbai, India

- **Lead a 10-person SEO team** across 6 enterprise client projects (3 direct reports; 7 team members coordinated through delegated workstreams) in BFSI, D2C/e-commerce and B2B SaaS, running a repeatable audit → roadmap → execution → QA → reporting cycle.
- **Primary client lead:** present roadmaps, forecasts and QBRs to VPs and founders quarterly, and report to marketing and product leads weekly.
- **Mentor the 3 direct reports;** 2 were promoted from Junior Analyst to Assistant Project Manager.
- Work across dev, content and design teams to ship technical, content and CRO changes. Run CRO audits on high-intent pages and turn findings into wireframes and layout mockups built with Claude, then spec developer-ready changes without writing production code.
- Lead technical SEO and Core Web Vitals programs; use GA4 and Search Console funnel data to drive continuous conversion and organic-visibility improvements, reported alongside rankings and traffic.
- **Built and run the agency's GEO/AEO practice,** taking clients from zero visibility in AI answers to a tracked, reported channel with a repeatable playbook applied across accounts. Designed an AI-visibility measurement system tracking brand mentions, citations and share of voice across ChatGPT, Perplexity and Google AI Overviews, built from zero.
- Led schema and entity optimization programs (structured data, entity disambiguation, knowledge-graph consistency) and configured AI-crawler access via llms.txt and robots directives.
- Scoped, built and shipped 13 internal AI tools (5 web apps, 8 plugins) for auditing, forecasting, classification and content, used daily by delivery teams. **The AI Citation Scraper cut reporting time from 2.5 hours to 1 hour per person.**
- **Recognition:** Star Performer award 4 times and Knowledge Leader award twice within 2 years.

CORE SKILLS & TOOLKIT

Leadership & delivery: Team leadership and mentoring · Roadmapping and forecasting · Audit-to-execution delivery · QA governance · Stakeholder and client reporting (QBRs) · Cross-functional work with dev, content, design and product
SEO & GEO: Technical SEO · Core Web Vitals · Schema and entity optimization · GEO/AEO · CRO · Backlink strategy
Tools: GA4 · Google Search Console · Looker Studio · Ahrefs · SEMrush · Screaming Frog · Claude and OpenAI APIs · Python automation · Bright Data API · GitHub · Render.com

SELECTED AI PROJECTS — BUILT AND SHIPPED AT GROWISTO

> 13 internal tools (5 live web apps and 8 plugins) built with Claude and LLM APIs, Bright Data API and Ahrefs API; version-controlled on GitHub, deployed on Render.com and used daily by delivery teams.

AI Overview Citation Scraper. Extracts the sites and pages Google cites in AI Overviews for target keywords. Built on a third-party scraping API to replace unreliable AI-citation data; cut reporting from 2.5 hours to 1 hour per person with high accuracy.

SEO Technical Audit. 106-parameter audit across crawlability, indexation, performance and search visibility, with prioritized fixes.

Schema Audit. Validates JSON-LD structured data at scale, flagging errors, warnings and rich-result opportunities.

SEO Potential Analysis. Forecasts realistic organic growth from current performance, market demand and competition.

Also built: Seasonality Dashboard · Keyword Classifier · Competitor Analyzer · Backlink Shortlister · Internal Linking · SEO Meta Tag Generator · Blog Content Review · SEO Page Level Audit · Content Creator.

EARLIER EXPERIENCE

2023-03 – 2024-07

SEO Analyst

Mirum India Pvt Ltd, Mumbai, India

- Managed SEO for two finance-domain clients, owning strategy, recommendations and monthly reporting to client stakeholders.
- Raised a mutual fund client's authority score from 58 to 64 through backlink analysis, toxic and lost-link cleanup and disavows; organic traffic grew 25% YoY.
- Ran competitor and SERP gap analysis to identify new landing-page opportunities, converting findings into prioritized roadmaps.

2021-08 – 2023-01

Senior SEO Executive

Ethinos Digital, Bangalore, India

- **Fixed a lending client's loan-application quality problem:** the client was getting many loan applications, but almost all were being rejected. I dug into the funnel and found the previous agency's content targeted low-CIBIL-score loan queries, drawing applicants who could never qualify. Removing it solved the problem and the client was happy.
- Audited and optimized client sites across keyword targeting, URL strategy, site architecture and content, working with dev teams at code level.
- Managed SEO for a large automotive client portfolio alongside other verticals, and built and executed link-building and digital PR outreach programs with PR and editorial teams.
- Developed ASO strategy for client mobile apps and presented monthly SEO and ASO performance reports.

2021-01 – 2021-08

Senior SEO Executive

Gya Labs, Hong Kong (Remote)

- Led SEO for a Shopify e-commerce business, covering keyword research and on-page optimization across 120 products.
- Ran Amazon SEO to improve listing rankings; secured backlinks through Wikipedia citations and negotiated guest-post placements.

2019-02 – 2020-09

Digital Marketing Executive

Myrsa Tech, Thane, India

- Handled on-page, off-page and technical SEO, JSON-LD structured data, GTM and Pixel implementation and organic social across 5 sites in finance, healthcare, education, IT and real estate.
- Ran Google and Facebook Ads campaigns; replaced purchased contact databases with an in-house LinkedIn email-mining process for lead generation.

2018-02 – 2018-11

Android Developer

Saint-Gobain Weber, Mumbai, India

- Sole developer of a production Android app for calculating Weber product coverage (UI, Firebase, authentication, datasheets, support), published on the Google Play Store.

EDUCATION

2016-04 – 2018-04

Master of Science in Data Science

Ramnarain Ruia College, Matunga, Mumbai

- Capstone, Clothing Trend Analysis: R/Shiny dashboard of clothing trends by season and region, using the Apriori algorithm to surface co-purchased combinations.
