PRATIK PALKAR

PROJECT MANAGER · SEO, GEO & AI PRODUCT

Mumbai, India 400078 | +91 86899 15775 | pratikpalkar1703@gmail.com | linkedin.com/in/pratik-palkar

PROFILE

I own the roadmap for how brands get found — on Google, and increasingly inside AI answers. Seven years in organic growth, now running end-to-end SEO and GEO delivery for 5+ clients and a team at Growisto, through a repeatable audit → roadmap → execution → QA → reporting cycle across BFSI, D2C/e-commerce and B2B SaaS. In BFSI (mutual funds, digital lending) I doubled a mutual fund's organic traffic in three months and fixed a lending client's loan-application quality problem. What makes me unusual: I don't just recommend the work, I build it — I turn CRO findings into wireframes and layout mockups myself using Claude rather than just briefing a designer, and I'm fluent in the technical layer of a website (site architecture, schema, crawlability, Core Web Vitals) without writing production code myself. That build-it instinct shipped 13 web-based SEO and GEO tools now in daily use across the agency.

7+ years	5+ clients	13 AI tools	BFSI · D2C · SaaS
SEO, GEO & digital growth	Plus an SEO delivery team	5 web apps · 8 plugins, shipped	Mutual funds, lending, retail, B2B

Toolkit: Roadmapping, backlog prioritization, audit-to-execution delivery cycles, QA governance, stakeholder & client reporting · Technical SEO, Core Web Vitals, schema & entity optimization, GEO/AEO, CRO · GA4, Google Search Console, Looker Studio, Ahrefs, SEMrush, Screaming Frog · Claude and OpenAI APIs, Python automation, Bright Data API, GitHub, Render.com

Product & UX: Wireframing and rapid prototyping with Claude for CRO and layout redesigns · Reads and specs page layout, information architecture and above-the-fold hierarchy the way a designer would · Fluent across the technical layer of a website — site architecture, schema, crawlability, Core Web Vitals — enough to spec developer-ready changes precisely, without writing production code myself.

IMPACT AT A GLANCE

BFSI · MUTUAL FUND · INDIA	D2C SPORTS EQUIPMENT · INDIA	CONSUMER ENERGY · INDIA	NEW SITE · KIDS EDUTAINMENT · US
2x	**3.1x**	**12.6x**	**3.2x**
organic traffic in just 3 months	non-brand organic clicks over 10 months; non-brand CTR more than doubled	AI-sourced traffic over 14 months, alongside 3.7x non-brand organic clicks	total organic clicks in 4 months, brand flat, against US category leaders

Client names withheld under NDA · Figures from Google Search Console and GA4.

EXPERIENCE

2024-07 – Current

SEO & GEO Project Manager

Growisto, Mumbai, India

- Own organic-growth strategy, roadmap and delivery for 5+ enterprise clients across BFSI, D2C/e-commerce and B2B SaaS, leading a delivery team through a repeatable audit → roadmap → execution → QA → reporting cycle; primary client contact for roadmaps, forecasting and QBRs.
- Lead technical SEO and Core Web Vitals programs; use GA4 and Search Console funnel data to drive continuous conversion and organic-visibility improvements, reported alongside rankings and traffic.
- Built and run the agency's GEO/AEO practice, taking clients from zero visibility in AI answers to a tracked, reported channel, with a repeatable playbook applied across accounts.
- Led schema and entity optimization programs (structured data, entity disambiguation, knowledge-graph consistency) and configured AI-crawler access via llms.txt and robots directives.
- Run CRO audits on high-intent landing pages and translate findings directly into wireframes and layout mockups built with Claude, then spec developer-ready changes across the site's technical layer — architecture, schema, crawlability, Core Web Vitals — without writing production code myself.
- Designed and shipped an AI-visibility measurement system tracking brand mentions, citations and share of voice across ChatGPT, Perplexity and Google AI Overviews — built the reporting infrastructure from zero.
- Scoped, built and ship 13 internal production tools (5 web apps, 8 plugins) for auditing, forecasting, classification and content; on GitHub, deployed on Render.com, used daily by the delivery team.

GROWISTO AI SUITE — DESIGNED, BUILT & SHIPPED

Internal AI platform for SEO & GEO delivery: 13 tools (5 live web apps + 8 plugins). Scoped, built and iterated with Claude · Claude/LLM APIs · Bright Data API · Ahrefs API · version-controlled on GitHub, deployed on Render.com · used daily by agency delivery teams.

AI Overview Citation Scraper. Extracts the sites and pages Google cites in AI Overviews for target keywords — the data layer behind the GEO strategy.

Seasonality Dashboard. Detects seasonal demand shifts from monthly volume data; forecasts against prior years with Ahrefs-benchmarked PDF reports.

Keyword Classifier. Auto-segments large keyword sets by search intent, funnel stage and business value.

SEO Meta Tag Generator. Batch-generates intent-aligned titles, meta descriptions and H1s from page content.

SEO Potential Analysis. Forecasts realistic organic growth from current performance, market demand and competition.

SEO Technical Audit. 106-parameter audit across crawlability, indexation, performance and search visibility, with prioritized fixes.

Schema Audit. Validates JSON-LD structured data at scale, flagging errors, warnings and rich-result opportunities.

Backlink Shortlister. Qualifies link opportunities on authority, relevance, traffic potential and outreach viability.

Blog Content Review. Pre-publish scoring of blog content on SEO, readability, depth and GEO/LLM readiness.

Competitor Analyzer. Benchmarks a site against three competitors on SEO, content, technical health and authority. Excel export.

SEO Page Level Audit. Scores pages against on-page ranking factors, surfacing content gaps and UX issues. PDF output.

Internal Linking. Maps internal link structure to surface opportunities and push link equity to priority pages.

Content Creator. Generates structured long-form articles aligned to target keywords, topics and user intent.

EARLIER EXPERIENCE

2023-03 – 2024-07

SEO Analyst

Mirum India Pvt Ltd, Mumbai, India

- Managed SEO for two finance-domain clients, owning strategy, recommendations and monthly reporting to client stakeholders.
- Drove authority-score improvement through backlink analysis, toxic and lost-link cleanup and disavows.
- Ran competitor and SERP gap analysis to identify new landing-page opportunities, converting findings into prioritized roadmaps.

2021-08 – 2023-01

Senior SEO Executive

Ethinos Digital, Bangalore, India

- **Fixed a lending client's loan-application quality problem:** the client was getting many loan applications, but almost all were being rejected. I dug into the funnel and found the previous agency's content targeted low-CIBIL-score loan queries, drawing applicants who could never qualify. Removing it solved the problem and the client was happy.
- Audited and optimized client sites across keyword targeting, URL strategy, site architecture and content, working with dev teams at code level.
- Managed SEO for a large automotive client portfolio alongside other verticals, and built and executed link-building and digital PR outreach programs with PR and editorial teams.
- Developed ASO strategy for client mobile apps and presented monthly SEO and ASO performance reports.

2021-01 – 2021-08

Senior SEO Executive

Gya Labs, Hong Kong (Remote)

- Led SEO for a Shopify e-commerce business, covering keyword research and on-page optimization across 120 products.
- Ran Amazon SEO to improve listing rankings; secured backlinks through Wikipedia citations and negotiated guest-post placements.

2019-02 – 2020-09

Digital Marketing Executive

Myrsa Tech, Thane, India

- Handled on-page, off-page and technical SEO, JSON-LD structured data, GTM and Pixel implementation and organic social across 5 sites in finance, healthcare, education, IT and real estate.
- Ran Google and Facebook Ads campaigns; replaced purchased contact databases with an in-house LinkedIn email-mining process for lead generation.

2018-02 – 2018-11

Android Developer

Saint-Gobain Weber, Mumbai, India

- Sole developer of a production Android app for calculating Weber product coverage (UI, Firebase, authentication, datasheets, support), published on the Google Play Store.

EDUCATION

2016-04 – 2018-04

Master of Science in Data Science

Ramnarain Ruia College, Matunga, Mumbai

- Capstone, Clothing Trend Analysis: R/Shiny dashboard of clothing trends by season and region, using the Apriori algorithm to surface co-purchased combinations.
